Autodesk AutoCAD was originally a stand-alone software product, developed on its own software platform. In March 2007, Autodesk acquired Alias, an outside vendor that had developed a more advanced product called Alias Systems Architect, which was combined with AutoCAD into AutoCAD LT. AutoCAD LT is a release of AutoCAD and as such is compatible with existing AutoCAD drawings and files. It includes software for AutoCAD

2002, and is used primarily as a 2D drafting program. In October 2007, Autodesk unveiled Autodesk Revit Architecture. Based on the same Revit core design platform as Revit, AutoCAD LT is integrated into the architecture program, allowing architecture design drawings to be created within the AutoCAD environment. One of Autodesk's major announcements is that there will be an AutoCAD-type application for the Mac called Onyx. The company plans to provide the first public beta release of Onyx in April 2012.

Onyx is a project similar to AutoCAD that can be run on Mac OS X 10.5 and above. Because it is based on the same underlying technology, Onyx can integrate into existing environments or be used as a stand-alone solution. Onyx is being developed in the form of a native application called Revit on the Mac, and not a traditional AutoCAD-style software application. Onyx has been pre-tested and passed by Autodesk before a formal release. I have just finished watching the intro of the Apple TV. Is this the beginning of the end for us?

Subscribers to the AppleTV is an IPTV system that will allow many options such as a video and photo sharing service, music, gaming, and a media center. Although it is not connected to the internet, it can stream media to connected devices. It is scheduled to be available at the end of 2010. It is an innovative product, and will likely keep many of us glued to our television screens. A recent announcement by Autodesk is that the update to AutoCAD LT 2012, AutoCAD 2012, is now available. AutoCAD 2012 is a companion app to AutoCAD LT

2012 for people who need to use AutoCAD LT 2012 for production purposes. It is compatible with AutoCAD LT 2012. This update provides all of the bug fixes and new features included in Auto
